## Introducing the Brush Applicator

The unique wool-wax base formulation (lanolin) of Fluid Film® provides long term protection for all metals and tack-free lubrication for moving parts. Stops existing corrosion on contact, penetrates to free-up heavily seized parts. Always active, Fluid Film® does not dry out or readily wash off. Will not harm paint, plastic and synthetic rubbers.

**Protects any and all metals from corrosion, while supplying superior lubrication for moving parts.**

### Brush Applicator

- Eliminates messy overspray
- Ideal for detail applications
- Brush application for desired consistency
- Economical, no wasted product

### Exceptional Brush Applications

- Tracks, Runners & Slides
- Battery terminals & Electrical connections
- Chains
- Nuts & Bolts
- Cables & Levers
- Tools
