

THIS IS A BETTER WAY TO PROTECT YOUR EQUIPMENT

FLUID FILM® STOPS RUST RIGHT NOW! LUBRICATES ALL MOVING METAL PARTS

PROTECT AND LUBRICATE

Car Doors

Chains

Recreation Gear

Boats

THE LONG TERM PROTECTION

- a) Contains no solvent.
- b) DOES NOT DRY OUT.
- c) Loosen those impossible to remove nuts.
- d) Inhibits further corrosion.
- e) Provides superior lubrication.

In use for 40 years to combat rust in marine and industrial atmospheres, FLUID FILM[®], with a wool wax (lanolin) base, is now available in aerosol cans. FLUID FILM may be applied over rust where it penetrates to base metal, bathing the surface with state of the art corrosion inhibitors, preventing further rust. On moving or sliding parts it provides lubrication. Where metal objects have frozen together, as in nuts and bolts, on hinges, etc., FLUID FILM softens rust and lubricates to make these parts move freely.

FLUID FILM contains no solvent. It does not dry out or evaporate, but continues to work long after other products have disappeared.

FLUID FILM[®] is a registered trademark of Eureka Chemical Company.
